

Asbestos Notice

2022-2023 School Year

The Asbestos Hazard Emergency Response Act (AHERA) of October 1987, mandated that local educational agencies have all buildings inspected for asbestos containing materials.

Pursuant to this rule, the Glen Rock Board of Education retained the firm of McCabe Environmental Services for the 2022-2023 school year to inspect, assess, and recommend response actions as part of a comprehensive management plan for the District. The district also schedules and performs three (3) Year re-inspections and six (6) Month periodic surveillances as required by the AHERA regulations.

Over the past year, due to maintenance and/or renovation activities, the District has removed asbestos-containing materials from locations at Byrd, Central, Coleman, Hamilton, and Middle and High schools.

The three-year re-inspection reports and six-month surveillance reports are available for review during normal office hours from Monday through Friday from 9:00 AM until 4:00 PM at the Administrative Offices located at 620 Harristown Road, NJ 07452.

Please contact me at mutchd@glenrocknj.org, if you have any questions.
